There were a lot of great memories shared by the supporters and team, including a few of our supporters from Spokane visiting the game and some of our Tacoma supporters making the long trip up to Vancouver. We caught up with a few of those supporters to share their stories. Thank you to everyone for taking the time to share their stories and images. Without all your support, this project would not have been possible. Keep on sharing and we'll see you at a Whitecaps match soon! Original Post by Spirit of the Forest on the Tacoma Whitecaps Facebook Page: We want to say thank you to the Tacoma Whitecaps supporters. We know that for many of you, traveling to Vancouver to see the Whitecaps game with your Tacoma Whitecaps family was far out of your way. We know

The problem is that the information collected by mic has to be made public. That's one of the reasons why it hasn't been used much. That's a good point, but let's think about it. If the integrity of a folder or file is completely unchecked, it's useless to know that this has a high integrity level. What's the point of knowing this? The problem is that the information collected by mic has to be made public. That's one of the reasons why it hasn't been used much. That's a good point, but let's think about it. If the integrity of a folder or file is completely unchecked, it's useless to know that this has a high integrity level. What's the point of knowing this? Click to expand... The problem is that MIC limits the level of information you can collect, you could use the subfolders of a folder as an example to get the picture. The subfolders of a folder have a high level of integrity but the subfolder itself can be marked as safe, but the subfolder is not. So even if the subfolder is safe, the folder itself may be marked as unsafe, because you can not find out what is exactly unsafe about the subfolder. If the integrity of a folder or file is completely unchecked, it's useless to know that this has a high integrity level. What's the point of knowing this? Click to expand... I actually would have to agree with this, mic doesn't add any value to what you already can do. And I would also agree with you that if the integrity level of a folder or file is completely unchecked, then its useless to know that this has a high integrity level.
