If you're looking for the full list of other countries where Hulu is available, just flip the country selector in the top right-hand corner of the page. This is getting a bit personal, but it's important that we fix this. Please e-mail michelle@lifehacker.com if you see the ad on your screen. — xeon — When watching Hulu on your Apple TV, you may encounter the "This video cannot be played at this time" screen. This can happen during live TV playback, but it seems to happen most when you're trying to pause or rewind live TV. There are a few things to try. For example, try turning your Apple TV to a different channel before trying again. If that doesn't work, see if you can pause/rewind live TV elsewhere. While watching live TV, the "Playback unavailable" screen sometimes appears. This error message appears if, for some reason, Hulu has trouble delivering the stream. We've heard that rebooting your router, hard rebooting your computer, or restarting your network can sometimes fix the problem. We're looking into some other ways to fix the issue, so if these options don't work, you might want to try another cable provider. Unfortunately, Hulu doesn't support live streaming from gaming consoles or set-top boxes. For more information on Hulu's live streaming policies for Xbox One, Playstation 4, iOS, and Android, see this FAQ. I tried watching a show on Hulu after recording it with Aereo, and all I got was a "Your playback is not available at this time" error message. This happens because 0cc13bf012
